

PREFACE: One of our agents managed to gain the suspect's trust, for a time, and collected some vital data. Unfortunately, we lost communication with this agent at approximately 2020-09-06T15:05:00Z and suspect the worst. Before going MIA our agent was able to send one last transmission, as attached. During transmission some data was lost, and our best forensic techs have deemed it unrecoverable, so you will need to work with the data given:
